

Lesson Plan
Technology | Week 1

We Love Our School
(Lower Grades)

Goal

Students will utilize various forms of technology to showcase their school or classroom.

Materials

- Computers, iPads, or other technology with programs to create media
- For younger students, using free, online drawing software may be more appropriate

Activities

Either individually, in small groups, or as a class, students pick a media program, such as Powerpoint, iMovie, Keynote, etc., and create a presentation that highlights what they love about their school or classroom.

Students can go through the building and take photos to include or interview the principal, students and teachers.

**For younger students, teachers may utilize free, online drawing software such as http://www.abcya.com/abcya_paint.htm or <http://www.nickjr.com/nick-jr-originals/games/nick-jr-free-draw/> with their students and have them create pictures of their classroom or school. Pictures can be printed and displayed, and the students can take turns describing their picture and what they love about their school.

Let students be creative in how they present! As opportunities allow, share these presentations with others in the school.
